SKILLS

Product Management: Requirements Writing, Use Cases & Acceptance Criteria, Roadmap Development, Agile/Scrum Planning, Data-Driven Decision Making, Cross-functional Collaboration, Release Management

Technical: LLM Evaluation, Agentic AI workflows, SaaS Platforms, REST APIs, SQL, Figma, Salesforce, Qlik, Informatica PowerCenter, Jira, SDLC, Python, Unix, Autosys

Domain Expertise: Fintech, Risk Management, Underwriting Systems, Access Provisioning, Financial Modeling, Brand Management

WORK EXPERIENCE

Technical Product Manager

Ygrene Energy Fund

July 2023 - Current

- Identified manual income verification as a bottleneck in the underwriting workflow and owned the product strategy to automate the process, evaluating build vs. buy trade-offs and leading integration of a third-party income verification API, reducing underwriting processing time by 30%
- Owned product roadmap for customer-facing portal modernization, aligning engineering capacity with business goals to prioritize Angular framework upgrade and targeted UX improvements, resulting in a 25% increase in user satisfaction while addressing accumulated technical debt
- Led translation of revised underwriting policy into system-level changes within the core funding calculation engine, recalibrating financing thresholds to increase maximum project funding by 5% while maintaining compliance and avoiding disruption to active pipeline projects
- Led end-to-end product execution of marketing website redesign to support company rebranding, defining requirements and sequencing delivery to ensure clear articulation of value proposition and alignment with top-of-funnel acquisition goals
- Owned the initiative to standardize sales funnel analytics, defining KPI architecture for performance, conversion, and pipeline tracking, and leading cross-functional implementation of automated reporting, enabling structured weekly business reviews and improved pipeline forecasting accuracy

Risk Management Associate

Bank of America

June 2019 - May 2022

- Onboarded 10 applications to a centralized access provisioning platform, eliminating manual access workflows and saving 30+ hours of operational effort per month
- Led a cross-functional team to identify and mitigate security threats discovered during automated and manual scans, resulting in 75% decrease in risk score
- Maintained business recovery plans for multiple applications and led annual disaster recovery testing to ensure operational resilience and compliance
- Spearheaded the Data Archival process with over 20GB of data, migrating it to internal servers for the decommissioning of Application in collaboration with Engineering Team

LEADERSHIP & PROGRAMS

- Selected participant for Digital Technology Immersion (DTI) Program at Johnson Graduate School of Management at Cornell focused on exploring AI, digital transformation, and platform strategy

EDUCATION

Cornell University

Master of Engineering in Engineering Management | GPA: 3.78

Ithaca, NY

Aug 2022 - May 2023

Vellore Institute of Technology

Bachelor of Technology in Computer Science and Engineering | GPA: 3.82

Tamil Nadu, India

July 2015 - May 2019
